Notes:

1. Please note that this information is what we managed to collect from entities that contacted our Embassy. In fact, we do not have official information on all support provided by Portuguese organizations.
2. Apart from that, although we were contacted by several Portuguese companies willing to send support in kind (food, baby food, underwear, shoes, clothes in general, etc.), and we have tried to contact Japanese entities in order to coordinate, most of these requests have been denied,
